EQUIPMENT FOR SUBSEA DECOMMISSIONING

We have 15 years experience in supplying and servicing steel processing equipment in the Australian market

An increasing number of oil and gas fields in Australia are reaching the end of their economical feasible production life. Consequently decommissioning activity will increase as production infrastructure needs to be removed. To cater for this growing industry Decomm Rentals has custom designed a number of subsea tools and auxiliary equipment to its rental fleet.

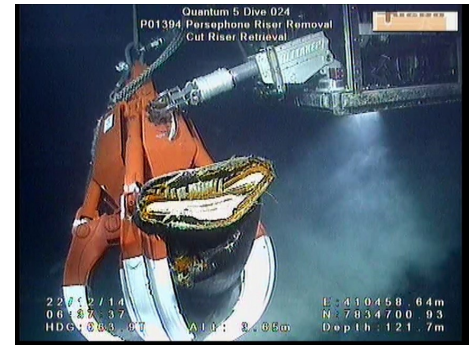

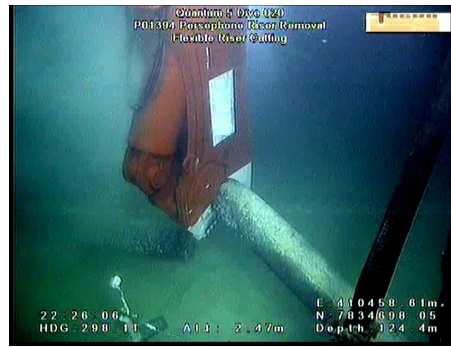

HYDRAULIC SUBSEA	CI4500 AF	CI19500
Weight in Air	5,000 kg	19,400 kg
Jaw Depth (C)	750 mm	1,300 mm
Jaw Opening (B)	740 mm	1,225 mm
Max Shear Capacity	14" OD Pipe	24" OD Pipe– 20" OD Pipe + 50mm reinforced concrete coating

Designed for cutting up to 250m water depth pipe lines, risers, cables and flexibles.

Operating subsea and on the deck.

Cutting time 1 minute

All equipment is fitted with a ROV panel for subsea contingencies. NATA tested rigging, full bunding and engineering support. Decomm shears come complete with spare cutting blades and a landing frame to ensure safe retrieval on the deck. Qualified Decomm offshore personnel is optional. With the downline spooler also available for safe handling of the down line.

HYDRAULIC SUBSEA GRAB	RV500- 5P
Weight in Air	1,140 kg
Load Capacity	3,500 kg
Max. Tine Opening	1,930 mm
Holding Capacity	14" OD Pipe

R56 Grab also available.
